GIVE YOUR PADEL COURT A Clean and Consistent Look

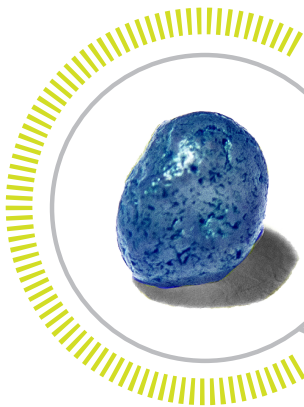

SAND FILLED COURT

Replace Raw Sand with
Envirofill 30-50 Blue

Envirofill® keeps your court performing better longer. It's durable, reusable, and with built-in Microban® technology, it's resistant to stain-causing bacteria. Because it's non-compacting, it will help your court perform its best with optimal traction year after year. Most of all, its aesthetically pleasing and enhances the beauty of your court.

Benefits

The perfect finishing touch. Envirofill adds to the beauty of your court. The blue gives a consistent colored surface, leaving everyone impressed.

Fights against mold and mildew. Microban® heavy metal free antimicrobial product protection is infused into Envirofill during the manufacturing process to help prevent the growth of bacteria, mold, and mildew that can cause stains, odors, and product deterioration.

Easy installation. Padel court turf can be very dense and difficult to infill. With its rounded shape, uniform size and smooth surface, Envirofill quickly settles into the turf saving you time, effort, and aggravation.

Consistent performance. Envirofill's highly rounded quartz core resists compaction and migration so the court's traction stays more consistent over the life of the surface.

Envirofill's exclusive partnership with Microban® provides an added level of antimicrobial protection for the lifetime of your infill.

Also available in Red Clay,
Green, and Black.
